EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

In claim 1 line 1, "method" was replaced with --computer-implemented method--.

Allowable Subject Matter

3. Claims 1, 4-6, 8-14, 16, 19-21, and 23-30 are allowed.

4. The following is an examiner's statement of reasons for allowance:

The prior art of record of record fails to teach or fairly suggest monitoring a secondary output parameter of a product and alerting an operator if the secondary output parameter is outside of a selected secondary output parameter value range to suggest a process adjustment without initiating an adaptation process; the adaptation process being initiated in response to a primary output parameter of the product being outside of a selected primary output parameter value range, the adaptation process including: adjusting a control on a machine used to create the product; updating an initial system model to define an updated system model in response to adjusting the

control; and running the machine in response to the updated system model, in combination with the remaining features and elements of the claimed invention.

Riley et al. US 2002/0107604 fails to teach two types of output parameters, one of which initiates tuning of a control model while another one that does not.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
